

CS 490/491L Progress Template.

Instructions: Each team member should enter their activities performed for the capstone project in the last two weeks, as well as their expected activities for the next two weeks, along with anything holding them up on completing their activities. These should be discussed by the team and their advisor(s) during the weekly/biweekly meetings, and the advisor(s) should sign and date the sheet indicating a correct assessment of the team's progress. Students need to upload a signed and scanned version to Canvas.. Progress reports uploaded to Canvas without a signature and score for progress will receive a 0 for progress.

200 words minimum per team member required for credit across the three questions.

Team/Project Name: MAAKDE

Team Member #1: Erik Vardumyan (Back-end)

What I did since last progress report:

- Took a look at my upcoming daily schedule for the semester to get a better idea of when I will focus on the work for this class. Still unsure due to not knowing yet which classes are going to be harder than the other.
- Make sure I have the required resources we might need. Python, Vscode.

Anything holding me up on my last progress report's expected activities:

N/A this is the first report.

What I plan to do before the next progress report:

- Finalize what my team and I want to choose for the project.
- Discuss with my team and I who is going to be part of the front end and back end.
- Freshen up on my python. I am fairly confident in my python skills, but I do need a visual reminder of the syntax and how Vscode works.

Team Member #2: Kennedy Johnson (Back-end)

What I did since last progress report:

- Organized the folder/documents that will be needed for this class/project
- Discussed with team members about the potential options we want to do for our project
- Created the GitHub repository for the project and added the other team members as collaborators
- Updated VSCode

Anything holding me up on my last progress report's expected activities:

N/A: First report

What I plan to do before the next progress report:

- Have a more solid idea of what project we will be working on
- Begin dividing the work between each of our group members

Team Member #3: Matthew Kim(Front-End)

What I did since last progress report:

- Gave potential ideas (TikTok Dating App, Music AI) to the team.
- Discussed potential roles that I would be open in participating in (Frontend/Backend).
- Laid out my skills/interests in a document that would help organize roles in the project.

Anything holding me up on my last progress report's expected activities:

N/A

What I plan to do before the next progress report:

Configure my IDE to help increase workflow, think of new ideas for the team project, and potentially start working on diagrams/system design for the project.

Team Member #4: Deni Cabaravdic (Back-End)

What I did since last progress report:

- Helped create a github organization so the team members can collaborate easily and frequently
- Researched VSCode live share to help us work together away from class while being able to see what each of us are doing
- Compiled ideas to see what we would like to officially do in the project
- Set up folder structure in GitHub to give us a start when coding

Anything holding me up on my last progress report's expected activities:

Nothing yet as it is the first report

What I plan to do before the next progress report:

- Start dividing work equally and finding out what every group member is strongest with
- Make sure to start a solid backbone for the code design in order to give us an easier time down the line

Team Member #5: Andres Macias (Front end)

What I did since last progress report:

- Created a base [starter document](#) that laid out each team member along with their interests, technical skill sets, and any current ideas or wants with the project.
- Gave feedback on ideas that group members came up with and insight to how certain projects could be brought to light with web development, if at all.
- Provided an idea for our project and laid out the foundation of it for the group to build off of and let their

Anything holding me up on my last progress report's expected activities:

- We came up with our idea pretty last minute and decided on it and so it left us with little time to really dive into it and analyze its credibility. Ideally i'd like for us to settle on core ideas earlier so that we can have more time to think about them and vet them.

What I plan to do before the next progress report:

- Thoroughly evaluate and vet ideas to make sure it's something that's realistic,

appealing to everyone in the group, and practical.

- Attempt to set up more structure for work time so that we can get through our plans in a timely manner that's also more organized.

Team Member #6: Aaron Gian Madrid (Front End)

What I did since last progress report:

- Contributed Project Ideas (Health Diagnosis Program for skin related diseases)
- Looked up Github and VSCode Liveshare practices to better streamline the project work to come
- Discussed skill strengths of team members and identified primary roles as well as secondary roles
- Look up optimal languages to utilize for the possible project ideas
- Identified my work/school load and try to utilize my time efficiently for project goals

Anything holding me up on my last progress report's expected activities:

- Not necessarily since its the first report we are conducting but I expect the pace to pick up soon enough
- To be completely honest, not too sure whether the group is pretty ahead of the game or were up to par with our initial progress. From the looks of it, it seems like the group is doing well staying on track and I'm absolutely confident an excellent outcome will come at the end of this course.

What I plan to do before the next progress report:

- Clearly identify which project we plan on conducting
- Find ways to present project idea(s) to be more sound when it is time to relay our project goal to the class and professor
- Identify all necessary tools and materials we need to get started on the project (if the project is approved and vetted by Professor Dantes)
- Establish skeletal structure and project outline to improve quality and efficiency of its progress
- Gather as much knowledge in regards to how the layout of this course will be and incorporate it into the steps of the project production/development process.

Date: _____

Team Progress (0 -- 3): _____

0 -- no progress has been made by the team

1 -- insufficient progress has been made for the team to complete their capstone

2 -- sufficient progress has been made for the team to complete their capstone

3 -- excellent progress has been made by the team

Report Quality (0 -- 3): _____

0 -- missing or empty report

1 -- report briefly written with incomplete sentences, lacking descriptions of work

2 -- well written report with sufficient description of work performed since last progress report

3 -- excellently written report with detailed description of each team members progress
