CS 490/491L Progress Report #4

Instructions: Each team member should enter their activities performed for the capstone project in the last two weeks, as well as their expected activities for the next two weeks, along with anything holding them up on completing their activities.
These should be discussed by the team and their advisor(s) during the weekly/biweekly meetings, and the advisor(s) should sign up and date the sheet indicating a correct assessment of the team's progress.
Students need to upload a signed and scanned version to Canvas. Progress reports uploaded to Canvas without a signature and score for progress will receive a 0 for progress.

Team/Project Name: MAAKDE

Team Member #1: Kennedy Johnson

What I did since my last progress report:
A meeting was held by the team to discuss the next actions for this semester. We have decided that we want to work more on the stylizing of the webpage while also beginning to work on the database and backend of the project.

Anything holding me up on my last progress report's expected activities:
N/A

What I plan to do before the next progress report:
By the next progress report, I hope to have a solid start on the database and actual plans of the project. Since this is the first week back, we are a bit slow back into progress. But I believe we will also work on learning Flask for the backend portion.

Team Member #2: Andres Macias

What I did since my last progress report:
Held a meeting with the team to catch up, organize, and shoot ideas of where we want to go from here. Also spoke with the backend team to get their general idea of what technologies we're going to use to connect our backend with the front.
Anything holding me up on my last progress report's expected activities:
N/A

What I plan to do before the next progress report:
Make sure that we have proper resources to learn from when connecting the front-end with the backend. This is crucial because both teams will begin to intermingle with each other in our work. Ensuring that we're all on the same page will make this process as smooth as possible.

Team Member #3: Aaron Gian Madrid

What I did since my last progress report:
Not too much progress had been done during the winter break. So during the first two weeks of classes our team made it a goal to reorient ourselves with the program and identify key issues that need to be addressed. We've decided to also look back on our documentations to help aid in this progress and also familiarize ourselves with the program if any of us had to get back up to speed.

Anything holding me up on my last progress report's expected activities:
Aside from having a winter break. Not too crazy much, maybe a minor setback on reorienting ourselves with our project. Nothing that the team can't handle and address.

What I plan to do before the next progress report:
In the process of managing our key deadlines and updating what we all need to do. Merging more work for our team members and having FE and BE work synchronously with each other now that a good portion of each section is somewhat done.

Team Member #4: Matthew Kim

What I did since my last progress report:
After being away from the team for a while, I realized that our progress on the project was not where I wanted it to be. So, I took the initiative to resituate myself with the team and make a schedule for the rest of the semester. I organized a team meeting and made sure that everyone was on the same page. We divided the work into smaller tasks and set a deadline for each one. Now, we are all working together smoothly and efficiently.

Anything holding me up on my last progress report's expected activities:
N/A

What I plan to do before the next progress report:
I understand that our project requires a lot of technical skills, so I plan to study more in that area. I have already identified some online courses and tutorials that will help me improve my skills. Additionally, I am going to spend more time working on the project, trying to find new solutions to the problems that we have encountered so far. I believe that with these efforts, we will be able to reach our goal of delivering a high-quality project.

Team Member #5: Erik Vardumyan

What I did since my last progress report:
Nothing in particular due to winter break. However, as a team we came together for a meeting to realign ourselves with the projects goals and recalibrate ourselves to get back into the work ethic we had last semester.

Anything holding me up on my last progress report's expected activities:
I would say N/A the only small thing would be like very semester rearrange my schedule to find the new best time to focus on this class

What I plan to do before the next progress report:
Start the process of creating a proper database with MySQL as well as connecting from and back end

Team Member #6: Deni Cabaravdic

What I did since my last progress report:
Not too much was done during the winter break. The team ended up regathering ourselves once the semester started so there is at the very least that. A good portion of the major components of the project have been completed so what we're doing is just getting things back online.

Anything holding me up on my last progress report's expected activities:
Not really. There were no major expectations of progress to be completed over the break and possibly the only issue we were facing at the beginning of the sem is just getting everyone back up to speed.

What I plan to do before the next progress report:
The next portion that needs to be addressed before the next progress report is to organize members of the team to work together to stitch and attach the Front End and Back End portions of the program. Possibly a few updates and quirks need to be worked on but nothing too crazy just yet.

Date: _____

Team Progress (0 -- 3): _____

0 -- no progress has been made by the team
1 -- insufficient progress has been made for the team to complete their capstone
2 -- sufficient progress has been made for the team to complete their capstone
3 -- excellent progress has been made by the team

Report Quality (0 -- 3): _____

0 -- missing or empty report
1 -- report briefly written with incomplete sentences, lacking descriptions of work
2 -- well written report with sufficient description of work performed since last progress report
3 -- excellently written report with detailed description of each team members progress
